Key questions defining research program:

• What motivates individuals to engage in living organ and tissue donation?
• What factors differentiate individuals who continue toward donation after matching a patient in need of a transplant from those who opt-out of donation?
• What is the role of ethnicity/culture in decisions about donation?
• What are HRQoL experiences of pediatric sibling donors?

Key words describing research program:

• Organ/tissue donation
• Organ/tissue transplantation
• Health services research
• Culture/ethnicity

Titles for shovel-ready research projects:

• Intimate partnerships and sexual function post stem cell transplant
• Predictors of longer-term symptoms post stem cell donation
• API decisions about stem cell donation

Data sources for shovel-ready research projects:

• Pre-post interview data from stem cell donors
• Interview data from those who continue toward donation and those who opt-out
• Questionnaire data from individuals post stem cell transplant
